

For Immediate Release: January 11, 2012

Simpson X Bandit Pro, FIA 8860 Approved Helmet Now Available To European Racers

Made entirely from ultra lightweight carbon fiber formed by auto clave technology, the Simpson X-Bandit Pro is fully certified with the latest FIA 8860 standard. This standard is a requirement for many international automobile racing series. The X-Bandit Pro is the first U.S. manufactured FIA 8860 approved helmet. If you are looking for aggressive styling and don't mind attention, the Simpson X Bandit Pro is the helmet for you. Simpson helmets are featured in the hit television series Top Gear and preferred by many professional racers throughout the world.

This helmet features advanced protection in all key areas of helmet safety and is manufactured using technology first seen in Formula 1 racing. The X-Bandit Pro is designed for professional racers that routinely race at some of the most extreme speeds in racing and are keenly aware of the importance of a well-built helmet for motorsport safety.

The X Bandit Pro was designed to spread impact energy over a larger area to reduce injury. The helmet also provides substantially greater protection from a crushability and penetration stand point.

Featuring advanced levels of performance and protection, the X-Bandit Pro is a value at \$2999.95 USD. The helmet will accommodate any approved head and neck restraint device. In most instances, a custom Simpson helmet can be built and delivered to Europe in less than 4 weeks.

Details
